

Worried about Feed Costs this Winter?

Sheep Natural Energy is an unique and specially formulated feed supplement to boost energy and protein supply during the critical tugging to lambing period. Use for flushing ewes to improve body condition and fertility, to maximise lamb crop and reduce barren ewes. Feed throughout pregnancy to maintain good ewe health and condition to ensure both ewe and lamb are in peak health as lambing approaches. The high energy dense formulation will help meet the ewes considerable demand for energy pre-post lambing, and will assist in combating twin lamb disease.

Its unique formulation includes multiple sources of energy, including rumen by pass vegetable oil and sugar from molasses to give her an energy boost when she needs it most. Quality protein sources are used to meet the demands of the growing lamb and ensure ewes have adequate quality colostrum and milk supply at lambing.

Omega 3 fatty acids from fish oil is added for improved fertility in tups and ewes and strong viable lambs. Packed with minerals, trace elements and vitamins, including ultra high vitamin E, Sheep Natural Energy will assist in optimising the immune status to help protect against infections and disease thus minimising the potential risk of lamb and ewe losses.

Sheep Natural Energy Benefits

- Energy dense (13.5MJ/kg DM) lick from multiple sources including rumen by pass vegetable oil
- Quality protein sources, including Hi Pro Soya, to support colostrum and milk Supply
- Ultra high vitamin E (500iu/kg) & selenium (15mg/kg), including Sel-Plex, to optimise immune function to help protect against disease and ease lambing process
- High zinc (2500mg/kg) level (including chelated sources) to support healthy feet and teats
- Added Omega 3 fatty acids from fish oil, to optimise fertility and thrifty lambs
